Senalka McDonald
Final Project DAT_13

Using color quantization techniques, I will explore trends in album cover styles over time and across genres. This is an unsupervised continuous machine learning experiment, using the following datasets:

https://archive.org/details/audio-covers
http://labrosa.ee.columbia.edu/millionsong/
http://mood.musiclab.si/en/dataset

This topic is of interest to me because it combines information about sound, color, text and aesthetics. I look forward to exploring and making discoveries with these datasets.
